Human rights in German development policy

BMZ Strategy and Guidelines on human rights in German development policy

The cross-sectoral strategy affirms the central role of human rights in German development policy and contains binding requirements for the implementing agencies; the Guidelines provide guidance on the incorporation of human rights standards and principles, including gender, in programme proposals.

- BMZ Strategy (2011), drawing a link between human rights and environmental protection:
http://www.bmz.de/en/publications/type_of_publication/strategies/Strategiepapier305_04_2011.pdf
- BMZ Guidelines (2013), see in particular Annex pp. xix-xx, xxiii-xxiv: http://www.bmz.de/en/zentrales_downloadarchiv/themen_und_schwerpunkte/menschenrechte/Leitfaden_PV_2013_en.pdf

BMZ (2010), Human rights in practice – Fact sheets on a human rights-based approach in development cooperation

Collection of 2-page fact sheets that explain what the human rights-based approach in development cooperation means in general and for all priority sectors of German development cooperation. The fact sheet on energy can be found on pp. 14-15, that on environmental and natural resource protection on pp. 18-19.

United Nations reference documents related to energy, climate and environment

International Covenant on Economic, Social and Cultural Rights (ICESCR) and International Covenant on Civil and Political Rights (ICCPR)

International human rights treaties make no specific reference to environmental protection, energy or climate change. Nor do they explicitly formulate environmental rights. However, the human rights to health (ICESCR Art. 12), life (ICCPR Art. 6), water and sanitation (ICESCR Arts. 11, 12), adequate housing (ICESCR Art. 11) and family (ICCPR Arts. 17, 23; ICESCR Art. 10), as well as the right of all peoples to freely dispose of their natural resources (ICESCR Arts. 1, 25) include various obligations related to the environment. They thus provide a substantive legal basis for an emerging human right to a clean and healthy environment, which was confirmed and further substantiated by international case law. Likewise, there exists no right to energy. Yet, such entitlement may be derived from the rights to an adequate standard of living (ICESCR Art. 11) and to benefit from scientific progress (ICESCR Art. 15).

UN Committee on Economic, Social and Cultural Rights (CESCR), General Comment No. 14 on ICESCR Article 12: the right to the highest attainable standard of health (E/C.12/2000/4, 2000)

The treaty bodies, committees of independent experts established under the UN human rights treaties, issue “General Comments”, authoritative interpretations of the provisions of the treaty. The CESCR, through General Comment No. 14, has interpreted Article 12 with respect to the right to health, defining the following core elements of the right: availability, accessibility, acceptability and quality. The General Comment defines a healthy environment as an underlying determinant of health.

- <http://www.refworld.org/docid/4538838d0.html>

CESCR, General Comment No. 15 on ICESCR Articles 11 and 12: the right to water (E/C.12/2002/11, 2003)

The CESCR, through General Comment No. 15, has spelled out the necessity of sustainable economic, environmental and social policies. It identifies the following essential elements of the right to water: availability, quality and accessibility (including affordability).

- <http://www.refworld.org/docid/4538838d11.html>

All states parties are obliged to submit regular reports to the CESCR on the steps taken to implement the rights stipulated by the Covenant. The Committee examines each report and addresses its concerns and recommendations to the state party in the form of “Concluding Observations”.

UN special procedures dealing with energy, climate and environment issues

The **UN Special Rapporteur on human rights and the environment (former Independent Expert)** – since 2012 held by Mr. John Knox – is mandated to study the human rights obligations related to the enjoyment of a safe, clean, healthy and sustainable environment, and to promote best practices. He carries out country visits and issues annual reports.

Jurisprudence

In recent years, the number of cases before and rulings by national and regional courts on the interrelatedness and interdependence of human rights and the environment has increased rapidly.

- A landmark case on environmental degradation and human rights violations was decided by the African Commission on Human and Peoples' Rights in 2002, ruling that independent environmental and human rights impact assessments are compulsory prior to all development projects. This was the very first concrete application of the peoples' right to freely dispose of their natural resources; it reaches far beyond the case law of other continents: <http://www.escri-net.org/docs/i/404115>
- The website „Right to environment“ explains the complex and partly implicit legal basis of the “right to a clean and healthy environment”. See section *Treaties and Case Law*: <http://www.righttoenvironment.org/default.asp?pid=53>
- The two NGOs EarthRights International and Earthjustice have filed numerous cases to hold corporations and governments accountable for human rights violations resulting from environmental degradation: <http://www.earthrights.org/legal>; http://earthjustice.org/our_work/cases

More on climate change and human rights

Intergovernmental Panel on Climate Change (IPCC)

Under the auspices of the UN, the IPCC constitutes an internationally accepted authority on climate change, as well as adaptation and mitigation options; see fifth climate change assessment report (2014).
